NUMBER 3. *Recent Research in Molecular Biology*

Scientific Editor: R. C. CLOWES

		PAGE
Introduction	*F. H. C. Crick*	183
Physical chemistry of transforming deoxyribonucleic acid	*R. Rownd*	187
Biochemistry of deoxyribonucleic acid and ribonucleic acid replication	*R. M. S. Smellie*	195
Structure and replication of the bacterial chromosome	*R. H. Pritchard*	203
Transfer of genetic material during bacterial conjugation	*Julian D. Gross*	206
Intracellular modification of nucleic acids	*K. A. Stacey*	211
Mechanism of protein biosynthesis	*H. R. V. Arnstein*	217
Antibiotics, proteins and nucleic acids	*J. F. Collins*	223
The genetic code	*A. O. W. Stretton*	229
Amino-acid-transfer ribonucleic acid: structure and function	*G. L. Brown & Sheila Lee*	236
Theories of gene regulation	*S. Brenner*	244
Interallelic complementation in vivo and in vitro	*Obaid Siddiqi*	249
Infectious drug resistance	*Naomi Datta*	254
Penicillinase plasmids in *Staphylococcus aureus*	*M. H. Richmond*	260
Molecular basis of contractility in muscle	*Jean Hanson & J. Lowy*	264
Notes on Contributors		272
Book Reviews		274

INDEX TO VOLUME TWENTY-ONE

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

Acceptor reaction, amino-acid, 236
—— —— interspecies specificity, 237
Acetylcholine, action on brain-stem neurones, 15
—— action on cells of central nervous system, 7
—— —— on cerebral cortical neurones, 13
—— antagonists, actions on cerebral cortical neurones, 13
—— release into perfused cerebral ventricles, 40
Acetylcholinesterase in cerebellum, 26
Acetylsalicylate, effect on brain, 52
Actin filament, 264, 266
Actinomycin, effect on nucleic-acid synthesis, 224
Actomyosin, 264
Adenosine triphosphatase, effect of anaesthetics on, 51
Adrenocortical hormones, influence on pituitary function, 83
Amines, oxidation inhibitors, effects on brain metabolism, 53
—— pharmacologically active, effect on brain, 53
Amino acids, acceptor reaction, 236
—— —— action on brain-stem neurones, 17
—— —— activation of, 217
—— —— and the genetic code, 231, 232
—— —— decarboxylase inhibitors, effects on brain metabolism, 54
—— —— excitant and depressant actions on cells of central nervous system, 7
—— —— excitant and depressant actions on cerebral cortical neurones, 11
Amino-acyl-transfer ribonucleic acids, synthesis of, 217
γ-Aminobutyric acid, neuro-inhibitory properties, 70
Amphetamine, action on brain-stem neurones, 17
Anaesthesia, recent theories, 46
Anaesthetics, action on cells of central nervous system, 9
—— effect on adenosine triphosphatase, 51
—— —— on brain metabolism in vitro, 49
—— —— on cation transport at neuronal membrane, 50
—— —— on electrical activity of brain, 51
—— —— on electron and energy transfer, 50
—— selectivity, 47
—— uptake and action on central nervous system, 44
Ansell, G. B. & Hawthorne, J. N.: *Phospholipids: chemistry, metabolism and function*, 94
Antibiotics affecting nucleic-acid synthesis, 223
—— affecting protein synthesis, 224
Anticholinesterases, action on cells of central nervous system, 7
Antigens, histocompatibility, 100
—— tumour-specific, 133
Armstrong, D., *see* Keele, C. A., 95
ARNSTEIN, H. R. V.: Mechanism of protein biosynthesis, 217
Auditory pathways, effect of lysergic acid diethylamide on, 30

B

Bacteria: *The bacteria: a treatise on structure and function. Vol. V: Heredity*, 274
—— chromosomes, structure and replication of, 203
—— conjugation, transfer of genetic material during, 206
—— *Function and structure in micro-organisms*, 275
—— *Genetics of bacteria and their viruses*, 274
Bacteriology: *Theory and practice in experimental bacteriology*, 276
BATCHELOR, J. R.: Histocompatibility systems, 100
Behaviour: *Animal behaviour and drug action*, 95
BERENBAUM, M. C.: Immunosuppressive agents, 140
Biochemistry of mental disease, 94
Biographical notes on contributors, 90, 181, 272
Book reviews, 93, 274
BRADLEY, P. B. & WOLSTENCROFT, J. H.: Actions of drugs on single neurones in the brain-stem, 15
Brain: *Chemical exploration of the brain*, 94
—— metabolism in vitro, effects of drugs on, 49
—— *A pharmacological approach to the brain*, 93
—— pharmacology, new experimental approach, 36
—— physiology, new experimental approach, 36
—— postsynaptic inhibition in, 21
—— protein metabolism, factors influencing, 76
—— uptake of drugs from ventricular lumen, 36
Brain-stem, neurones, actions of drugs on, 15
BRENNER, S.: Theories of gene regulation, 244
BROWN, G. L. & LEE, S.: Amino-acid-transfer ribonucleic acid: structure and function, 236
Butler, J. A. V.: *The life of the cell: its nature, origin and development*, 276

INDEX TO VOLUME TWENTY-ONE

C

CALNE, R. Y.: Supply and preservation of kidneys, 166
CAMPBELL, H. J. & EAYRS, J. T.: Influence of hormones on the central nervous system, 81
Cancer cell, immunology: tumour-specific antigens, 133
Cartilage grafts, 153
Catecholamines, action on cells of central nervous system, 8
—— antimetabolites, effects on metabolism in brain, 59
—— effect of α-methyldopa on, 66
—— metabolism in brain, effects of drugs on, 57
—— metabolites, effects on metabolism in brain, 60
Cells: *The life of the cell*, 276
—— *Mécanismes de régulation des activités cellulaires chez les microorganismes*, 277
Cerebellar cortex, action of cholinergic substances on, 27
Cerebellum, cholinergic mechanisms in, 26
Cerebral cortex, neurones, actions of drugs on, 10
—— ventricles, regional perfusion with drugs, 38
Chloramphenicol, effect on protein synthesis, 226
Chlorpromazine, effect on brain, 52
Cholinergic mechanisms in cerebellum, 26
Cholinomimetics, action on cells of central nervous system, 7
—— action on cerebral cortical neurones, 13
Chromosome, bacterial, structure and replication of, 203
Ciba Foundation Symposium: *Animal behaviour and drug action*, 95
Cohn, W. E., *see* Davidson, J. N., 275
COLLINS, J. F.: Antibiotics, proteins and nucleic acids, 223
Colloques Internationaux du C.N.R.S. *Mécanismes de régulation des activités cellulaires chez les microorganismes*, 277
Compatibility typing in transplantation, 162
Contributors, biographical notes on, 90, 181, 272
Convulsants, effects on brain metabolism, 54
Corneal graft, biological problems of, 147
CRICK, F. H. C.: Recent research in molecular biology: Introduction to symposium, 183
CURTIS, D. R.: Actions of drugs on single neurones in the spinal cord and thalamus, 5

D

DATTA, N.: Infectious drug resistance, 254
Davidson, J. N. & Cohn, W. E. (editors): *Progress in nucleic acid research and molecular biology: Vol. 3*, 275
Deoxyribonucleic acid, compositional heterogeneity, 188
—— —— denaturation, thermal, 190
—— —— denatured, physical properties, 189
—— —— —— strand separation, 189
—— —— methylation of, 213
—— —— minor components, 211
—— —— molecular weight, 188
—— —— native, inactivation, 189
—— —— —— structure, 187
—— —— of *T*-even phages, glucosylation of, 213
—— —— partially denatured, 190
—— —— renatured, mechanism of renaturation, 192
—— —— —— physical properties, 191
—— —— —— transforming activity, 193
—— —— replication, biochemistry of, 195
—— —— synthesis, necessity of, for genetic transfer, 209
—— —— transferred, physical characterization, 208
—— —— transforming activity, physical chemistry of, 187
—— —— —— —— thermal inactivation of, 191
de Reuck, A. V. S., *see* Steinberg, H., 95
Donor selection in transplantation, 162
Dopamine, effects on metabolism of catecholamines in brain, 57
Drug resistance, transfer by infection, 254
Drugs: *Animal behaviour and drug action*, 95
Drysdale, R. B., *see* Peacocke, A. R., 277

E

EAYRS, J. T., *see* CAMPBELL, H. J., 81
ECCLES, J. C.: Pharmacology of central inhibitory synapses, 19
—— *The physiology of synapses*, 93
ELLIOTT, K. A. C.: γ-Aminobutyric acid and other inhibitory substances, 70
Endocrine organs, transplantation, 157
Enzyme biosynthesis, genetic regulation, 244

F

Factor I, neuro-inhibitory properties, 70
FELDBERG, W.: *A pharmacological approach to the brain from its inner and outer surface*, 93
—— & FLEISCHHAUER, K.: A new experimental approach to the physiology and pharmacology of the brain, 36
Fincham, J.R.S.: *Microbial and molecular genetics*, 277
Finney, D. J.: *Statistical method in biological assay*, 2nd ed., 96
FLEISCHHAUER, K., *see* FELDBERG, W., 36
Fluoroacetate, effects on brain metabolism, 54

G

GADDUM: Sir J.: Pharmacology of the central nervous system: Introduction to symposium, 1
Gene and protein, co-linearity, 229
—— regulation, mechanism of, 246
—— —— theories, 244
Genes, interallelic complementation in vivo and in vitro, 249
Genetic code, 229
—— material, transfer during bacterial conjugation, 206
Genetics: *Microbial and molecular genetics*, 277
GIBSON, T.: Cartilage grafts, 153
GOLDSMITH, K. L. G.: Donor selection and compatibility typing, 162
Gonadal hormones, influence on pituitary function, 83
GOWANS, J. L.: The role of lymphocytes in the destruction of homografts, 106
GOWLAND, G.: Induction of transplantation tolerance in adult animals, 123
Graft-versus-host reaction in chick embryo, 129
GROSS, J. D.: Transfer of genetic material during bacterial conjugation, 206
Gunsalus, I. C. & Stanier, R. Y. (editors): *The bacteria: a treatise on structure and function. Vol. V: Heredity*, 274

H

HADDOW, A.: Immunology of the cancer cell: tumour-specific antigens, 133
Haemopoietic tissues, transplantation, 118
Haggis, G. H., Michie, D., Muir, A. R., Roberts, K. B. & Walker, P. M. B.: *Introduction to molecular biology*, 274
Hawthorne, J. N., *see* Ansell, G. B., 94
Hayes, W.: *The genetics of bacteria and their viruses: studies in basic genetics and molecular biology*, 274
Heredity: *The molecular basis of heredity*, 277
Histocompatibility systems, 100
Homografts, destruction, role of lymphocytes, 106
Hormones, influence on central nervous system, 81
5-Hydroxytryptamine, action on brain-stem neurones, 17
—— effect of α-methyldopa on, 68
—— metabolism in central nervous system, 62

I

Immunity in transplantation, role of thymus, 111
Immunosuppressive agents, 140
Indoles, action on cells of central nervous system, 8
Ions, inorganic, actions on cerebral cortical neurones, 12
Itch: *Substances producing and pain itch*, 95

J

Jacob–Monod operon concept of gene regulation, 245, 246

K

Keele, C. A. & Armstrong, D.: *Substances producing pain, and itch* 95
Keratoplasty, biological problems, 147
KEY, B. J.: Effect of lysergic acid diethylamide on potentials evoked in the specific sensory pathways, 30
Kidney homograft rejection, morphological aspects, 171
—— homotransplant recipients, management, 179
—— supply and preservation for transplantation, 166
Knight, J., *see* Steinberg, H., 95
KRNJEVIĆ, K.: Actions of drugs on single neurones in the cerebral cortex, 10
KROHN, P. L.: Transplantation of endocrine organs, with special reference to the ovary, 157

L

Lead compounds, effect on brain, 52
LEE, S., *see* BROWN, G. L., 236
LOUTIT, J. F.: Transplantation of haemopoietic tissues, 118
LOWY, J., *see* HANSON, J., 264
Lymphocytes, role in destruction of homografts, 106
Lysergic acid diethylamide, action on brain-stem neurones, 17
—— —— —— effect on potentials in specific sensory pathways, 30

M

McIlwain, H.: *Chemical exploration of the brain: a study of cerebral excitability and ion movement*, 94
McLennan, H.: *Synaptic transmission*, 93
MEDAWAR, P. B.: Transplantation of tissues and organs: Introduction to symposium, 97
α-Methyldopa, action in brain, 66
α-Methyl-*m*-tyrosine, action in brain, 68
Meynell, E., *see* Meynell, G. G., 276
Meynell, G. G. & Meynell, E.: *Theory and practice in experimental bacteriology*, 276
MICHAEL, R. P.: Oestrogens in the central nervous system, 87
Michie, D., *see* Haggis, G. H., 274
Microelectrophoresis in study of pharmacology of central nervous system, 5
Micro-organisms: *Function and structure in micro-organisms*, 275

INDEX TO VOLUME TWENTY-ONE

—— *Mécanismes de régulation des activités cellulaires chez les microorganismes*, 277
—— *Microbial and molecular genetics*, 277
MILLER, J. F. A. P.: The thymus and transplantation immunity, 111
Mitomycin, effect on nucleic-acid synthesis, 223
Molecular biology: *Introduction to molecular biology*, 274
—— —— *The molecular basis of heredity*, 277
—— —— *Progress in nucleic acid research and molecular biology, Vol. 3*, 275
—— —— recent research: Introduction to symposium, 183
—— genetics: *Microbial and molecular genetics*, 277
Muir, A. R., *see* Haggis, G. H., 274
Muscle, contractility, molecular basis, 264
—— contraction, structural changes during, 269
Myosin, 264, 265

N

Nervous system, central, influence of hormones on, 81
—— —— —— influence of oestrogens on, 87
—— —— —— inhibitory synapses, pharmacology of, 19
—— —— —— pharmacology of: Introduction to symposium, 1
Neurochemistry: *Comparative neurochemistry. Proceedings of the Fifth International Neurochemical Symposium*, 95
Neuro-inhibitory substances, 70
Neurones in brain-stem, actions of drugs on, 15
—— in cerebral cortex, actions of drugs on, 10
—— in spinal cord and thalamus, actions of drugs on, 5
Noradrenaline, action on brain-stem neurones, 15
—— —— *Progress in nucleic acid research and molecular biology, Vol. 3*, 275
—— —— synthesis, antibiotics affecting, 223
Nucleic acids, intracellular modification, 211

O

Oestrogens, influence on central nervous system, 87
Organs, transplantation, biological and clinical aspects, 176
—— —— Introduction to symposium, 97
Ovary, transplantation, 157
Ouabain, effect on brain metabolism, 52

P

Pain: *Substances producing pain and itch*, 95
PATON, W. D. M. & SPEDEN, R. N.: Uptake of anaesthetics and their action on the central nervous system, 44
Peacocke, A. R. & Drysdale, R. B.: *The molecular basis of heredity*, 277
Penicillinase genes, nature of, 262
—— plasmids in *Staph. aureus*, 260
Pentobarbitone, action on brain-stem neurones, 17
Peptide-bond synthesis and protein release, 220
PHILLIS, J. W.: Cholinergic mechanisms in the cerebellum, 26
Phospholipids: chemistry, metabolism and function, 94
Picrotoxin, effects on brain metabolism, 54
Pituitary function, regulation, 82
Plasmids, penicillinase, in *Staph. aureus*, 260
Pollock, M. R. & Richmond, M. H. (editors): *Function and structure in micro-organisms*, 275
Polynucleotides, messenger, interaction with ribosomes, 219
Polysomes, occurrence in protein biosynthesis, 219
PORTER, K. A.: Morphological aspects of renal homograft rejection, 171
PRITCHARD, R. H.: Structure and replication of the bacterial chromosome, 203
Progress in nucleic acid research and molecular biology, Vol. 3, 275
Protein and gene, co-linearity, 229
—— biosynthesis, mechanism of, 217
—— metabolism of brain, 76
—— *Organization for protein biosynthesis*, 276
—— synthesis, antibiotics affecting, 225
—— —— function of transfer ribonucleic acid in, 236
Psychiatry: *Biochemistry of mental disease*, 94
Puromycin, effect on protein synthesis, 225

Q

QUASTEL, J. H.: Effects of drugs on metabolism of the brain in vitro, 49

R

Reserpine, effect on brain metabolism, 53
—— responses to, influence of α-methyldopa on, 67
Ribonucleic acid, amino-acid-transfer: structure and function, 236
—— —— amino-acyl-transfer, synthesis of, 217
—— —— biosynthesis, 198
—— —— code words, "dictionary" of, 231
—— —— messenger, length of, 219
—— —— methylation of, 212
—— —— minor components, 211
—— —— polymerase, DNA-dependent, 199
—— —— replication, biochemistry of, 195
—— —— soluble, heterogeneity of, 238
—— —— transfer, attachment to ribonucleic acids, 220
—— —— —— functional modification, 241
—— —— —— in the transfer reaction, 238
—— —— —— primary structure, 239
—— —— —— secondary structure, 239
Ribosomes, function in protein biosynthesis, 218
RICHMOND, M. H.: Penicillinase plasmids in *Staphylococcus aureus*, 260
—— *see* Pollock, M. R., 275
RICHTER, D.: Factors influencing the protein metabolism of the brain, 76
—— (editor): *Comparative neurochemistry. Proceedings of the Fifth Neurochemical Symposium*, 95
Roberts, K. B., *see* Haggis, G. H., 274
ROWND, R.: Physical chemistry of transforming deoxyribonucleic acid, 187
RYCROFT, Sir B.: Biological problems of the corneal graft, 147

S

Sensory pathways, potentials in, effect of lysergic acid diethylamide on, 30
Sex hormones, influence on central nervous system, 87
SHARMAN, D. F.: Metabolism of tryptamine and related compounds in the central nervous system, 62
SIDDIQI, O.: Interallelic complementation in vivo and in vitro, 249
SIMONSEN, M.: Recent experiments on the graft-versus-host reaction in the chick embryo, 129
SMELLIE, R. M. S.: Biochemistry of deoxyribonucleic acid and ribonucleic acid replication, 195
SOURKES, T. L.: The action of α-methyldopa in the brain, 66
—— *Biochemistry of mental disease*, 94
SPEDEN, R. N., *see* PATON, W. D. M., 44
Spinal cord, neurones, actions of drugs on, 5
—— —— postsynaptic inhibition in, 20
—— —— presynaptic inhibition in, 23
STACEY, K. A.: Intracellular modification of nucleic acids, 211
Stanier, R. Y., *see* Gunsalus, I. C., 274
Staphylococcus aureus, penicillinase plasmids in, 260
Statistical method in biological assay, 2nd ed., 96
Steinberg, H., de Reuck, A. V. S. & Knight, J.: *Ciba Foundation Symposium jointly with the Co-ordinating Committee for Symposia on Drug Action: Animal behaviour and drug action*, 95
Stilboestrol implants in brain, effects on behaviour, 87
Streptomycin, effect on protein synthesis, 225
STRETTON, A. O. W.: The genetic code, 229
Strychnine, effects on brain metabolism, 54
Synapses, inhibitory, of central nervous system, pharmacology of, 19
—— *Physiology of synapses*, 93
—— *Synaptic transmission*, 93

T

Temperature control, 41
Thalamus, neurones, actions of drugs on, 5
Thymectomy, immunological effects, 112
—— reconstitution after, 114
Thymus and transplantation immunity, 111
—— cells, immunological competence, 112
—— immunological action, possible mechanisms, 115
Thyroid gland and protein metabolism, 76
—— hormones, influence on pituitary function, 82
Tin compounds, effect on brain, 52
Tissue transplantation, donor selection and compatibility typing, 162
—— —— histocompatibility system, 100
—— —— homografts, role of lymphocytes in destruction, 106
—— —— immunosuppressive agents, 140
—— —— Introduction to symposium, 97
—— —— tolerance to, induction in adult animals, 123
Transplantation, immunosuppressive agents, 140
—— of organs, biological and clinical aspects, 176
—— of tissues and organs: Introduction to symposium, 97
—— tolerance, induction in adult animals, 123
Tryptamine, metabolism in central nervous system, 62
Tubocurarine, sites of action when perfused through cerebral ventricles, 39
Tumours, specific antigens, 133

V

Visual projection, effect of lysergic acid diethylamide on, 30
VOGT, M.: Effect of drugs on metabolism of catecholamines in the brain, 57

W

Walker, P. M. B., *see* Haggis, G. H., 274
Watson–Crick model for structure of deoxyribonucleic acid, 187
Wiseman, A.: *Organization for protein biosynthesis*, 276
